Australian Dental Health Victoria Initiative Continues Its Commitment To Deliver The Highest Quality Dental Service For Victorian Schools

Schools do not need to wait until 2022, it is available now.

Australian Dental Health Victoria established its commitment to Victorian Schools beginning **Term 1, 2014** and will continue to provide the safest, most ethical treatment for Victorian students. Over **859** schools have been serviced since the beginning of this initiative, with over **52,000** students receiving vital dental treatment. For nearly **6 years** the initiative has created a positive impact by freeing up critical space within public dental clinics, aiding those that are most at need in our communities.

Dental vans are nothing new within Victoria. The lack of awareness for this **initiative** has hindered Victorian schools' participation. It is now time to act to secure a visit for your school.

The **ADHV** has found that over **40%** of the students examined, had never been seen by a dentist. This has allowed the **ADHV** to identify and address undetected dental decay in thousands of students across Victoria.

- **ADHV** is legally compliant with The Department of Education and Training requirements, all further compliances will be provided to schools that apply.
- Australian Dental Health Victoria (**ADHV**) complies with the Australian Health Practitioner Regulation Agency (**AHPRA**).
- **ADHV** is compliant with the Australian Department of Health & Human Services standards.

Australian Dental Health Victoria will examine children at **ZERO** out of pocket cost providing an equal opportunity when it comes to dental health. Every child within every school that applies has the opportunity to see the dentist. This includes all refugee children.

The positive community impact is a reflection of the **ADHV's** extensive experience in managing and accommodating to each school and family needs.

Australian Dental Health Victoria is able to provide students with:

- Check-ups
- Examinations
- Fillings
- Root canals
- Tooth strengthening fluoride varnish
- Preventative mouth cleans
- Protective coatings for permanent teeth
- Free oral health education
- Simple extractions
- Orthodontic referrals for braces

Act now to ensure your school is receiving only the highest quality compliant dental service.

Every Victorian School Is Entitled To This Service.

OUR KIDS. OUR SCHOOLS. OUR FUTURE.
